TECNAM U.S. announces the “Tecnam Airframe and Engine Hourly Cost Maintenance Program” in partnership with PistonPower™

Sebring, TECNAM U.S., Inc. is proud to announce their partnership with PistonPower™ to offer the Tecnam Airframe and Engine Program on ALL new delivered aircraft, as well as ALL in-service Tecnam aircraft, through their Authorized Dealers and Authorized Service Centers in US & Canada.

The Tecnam Airframe and Engine Program is an hourly cost program where the operator pays an hourly rate based on utilization which covers parts and labor for unscheduled and scheduled maintenance. The program not only provides protection from unforeseen and unscheduled maintenance expenses but also allows predictability of having a fixed budget for the operation of the aircraft or fleet.

Now US and Canadian's buyers could select the Tecnam Airframe and Engine Program as an option at time of purchase.

Shannon Yeager, Sales Director for Tecnam US said, “With PistonPower™ our owners and operators can benefit from cost predictability, substantial peace of mind and increased aircraft residual value”, “Now with the new Airframe and Engine Program being made available to all in-service Tecnam owners/operators they can enjoy the same benefits as new Tecnam buyers at the time of confirming their airplane”, added Yeager.

PistonPower™ CEO, Ron Zilberbrand said, “We are very excited about this new strategic partnership, as it will distinguish Tecnam moving forward and increase sales by adding additional options and value to each covered aircraft. We look forward to enrolling as many as possible new and the majority of in-service aircraft sold, as well as in-service aircraft currently flying”, added Zilberbrand.

Zilberbrand previously founded Jet Support Services, Inc. (JSSI), the premier independent provider of service programs for turbine airframes and engines.

About Piston Power™

PistonPower™ is general aviation's first and only comprehensive protection program for piston aircraft, designed by aviation pros who've designed and built similar programs for turbine engines. PistonPower™ brings stability to your maintenance budget and peace of mind to your business and personal flying to minimize the risk of costly unplanned repairs and protect you from catastrophic downtime.

About TECNAM: "Quality Aircraft since 1948"

TECNAM's roots go all the way back to the Italian brothers Luigi and Giovanni Pascale, who began to develop and produce innovative aircraft soon after the end of WWII. Since those early beginnings, the family has continued to create original models, first gaining worldwide recognition under the name Partenavia, which translates as "Naples Aviation".

Costruzioni Aeronautiche **TECNAM** was established in March 1986 and now operates in three production facilities. The Casoria facility is located adjacent to Naples' Capodichino Airport, while the main factory is next to the "Oreste Salomone" Airport in Capua. Recently a new facility was established in Sebring, Florida, USA and in Australia to serve and support the needs of Tecnam's local owners and operators.
